REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance: Independent claims 29, 35, 39, and 45 all contain the limitation, taking claim 29 as exemplary, "comparing a subset of bits from a first operand to a subset of bits from a second operand to determine a predicted predicate value (PPV) for a predicate of a predicated instruction." Prior art searched and found contained very little in regards to predicting or speculating predicate instructions. The art searched and found regarding predicting predicate instructions did not teach determining the predicted predicate value based upon a comparison of bits from a first operand and a second operand and, the ones that did, fell under obviousness type double patenting (same inventors and assignee) and were overcome by filing the filing of Terminal Disclaimers.
2. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
